DISINFECTANT			
No.	Product	Area of Application	Properties

New Course: Food Safety: Chemical Control

Understanding chemical control is essential to maintaining food safety. In this 20-minute course, you'll learn why chemical control matters, how to safely handle and store chemicals, and your role in preventing contamination. Gain the knowledge to protect both products and people by implementing proper chemical safety practices.

- [Stand Up 4 Grain Safety](#)
- Women in Construction Week
- National Inhalants and Poison Awareness Week

APRIL

- National Agriculture Day
- National Agriculture Week
- National Women in Agriculture Day

Is It Safe?

YOU BET!

Tunnel access hatches are often left open to provide natural ventilation. If not adequately guarded this poses a fall hazard. This hatch is protected with a guardrail and safety gate. The ladder also extends at least 42 inches above the surface to allow workers to safely climb into and out of the tunnel.

ENCOURAGING WORD

"Be strong and courageous. Do not be afraid or terrified because of them, for the Lord your God goes with you; he will never leave you nor forsake you."
