SAFETY SAM INSIDER TIP...

Spring is here and it's time to hit the fields. We offer online courses specific to your agronomy operations. Courses cover important topics such as anhydrous ammonia, pesticide safety, pesticide repackaging, applicators safety in the field, the Worker Protection Standard, implements of agriculture and much more. [Contact us](#) for more information.

New Safety Course

"OSHA Grain Handling Standard Overview"

It's important for managers and supervisors to understand the requirements of OSHA 29 CFR 1910.272. Upon completion of this course, learners will recognize the standard's requirements for bin entry, emergency action plans, contractors, housekeeping, employee training, and preventive maintenance. Check out our [course catalog](#) to learn more about our online safety courses.

Announcements:

Grain Handling Safety Training

Over the past ten years we've developed a full range of safety courses focused on the grain handling industry. According to Joe Mlynek, our grain handling subject matter expert, "We keep a pulse on the grain industry. We routinely communicate with managers and front-line workers to identify their needs. The best way to understand the challenges they face is to ask." [Contact us](#) to learn more about our wide range of agriculture safety courses.

TAKE 5 SAFETY MESSAGE

Active Shooter Incidents - Run, Hide, Fight

This month's Take-5 Safety Talk covers active shooter incidents. Active shooter incidents are unpredictable and evolve quickly. They are typically over within 15 minutes and before law enforcement arrives on the scene. According to the Department of Homeland Security, there are three ways to respond during an active shooter crisis situation. You can **run, hide, or fight**.

Our library of safety talks can be accessed by your **Safety Made Simple** administrator in the resources section of your company's training portal.

Click [here](#) to check out the full list of available Take 5 topics.

NEW AND UPDATED COURSES

We continue to update existing courses and release new courses. Click [here](#) to view our current online course catalog.

The Rotary Foundation Recognizes Safety Made Simple

We were recently recognized by The Rotary Foundation of Rotary International for "tangible and significant assistance given for the furtherance of better understanding and friendly relations among peoples of the world." According to CEO, Chuck Pirie, "We are honored to be recognized by the Rotary Foundation and grateful to be in a position to serve others."

This Month's Safety Simplified Blog "Feedlot Safety - Low Stress Cattle Handling"

Stressed cattle can easily injure or kill a worker. According to the Kansas Livestock Association's Work Comp Program, 45% of feedlot injuries involve working with cattle. Understanding cattle behavior and implementing low stress cattle handling practices can prevent serious injuries and fatalities. Low-stress cattle handling incorporates the understanding of cattle's natural behaviors. Using this knowledge, cattle handlers can positively affect cattle movement. Click [here](#) to read this blog in its entirety.

Is it Safe? No Way!

Fire extinguishers and other forms of emergency equipment must be accessible. According to OSHA "The employer shall provide portable fire extinguishers and shall mount, locate and identify them so that they are readily accessible to employees without subjecting the employees to possible injury."

We offer safety courses on general industry topics including hot work, emergency exits and response, and portable fire extinguishers. Check out our [website](#) to learn more.

If you have a photo of a workplace situation that you would like to share, [send it to us!](#) We may use it in the Safety Scoop for others to learn from!
