TEMPORARY GRAIN STORAGE: INSTALLING/REMOVING TARPS

When permanent grain storage reaches capacity, temporary grain storage keeps operations moving—but it also introduces unique safety hazards. This course covers the risks associated with working on temporary grain storage, with a focus on safely installing and removing tarps. Learn how to recognize common hazards, identify key storage components, and apply safe work practices to help prevent injuries.

TRACEABILITY AND RECALL

A fast, effective recall can protect consumers, preserve your company's reputation, and save lives. This course explains the essential components of traceability and recall programs, including recall team responsibilities, product tracking, and the procedures needed to respond quickly when a food safety issue arises. Learn how strong traceability systems help identify affected products, streamline recalls, and strengthen your food safety program.

COURSE INFO

Protect your products, your employees, and your customers with our comprehensive [Food Safety training library](#). From HACCP, Good Manufacturing Practices (GMPs), and sanitation to allergen handling, traceability, food defense, and crisis management, our courses cover the essential topics needed to build a strong food safety culture and support regulatory compliance. Whether you're onboarding new employees or reinforcing best practices, these engaging online courses provide practical knowledge to help your team identify hazards, prevent contamination, and produce safe, high-quality food.

Contractor Employee Burned by Combustible Dust

Check out our selected Take 5 toolbox or Take 2 video

Real incidents provide real lessons. Watch this [Take 2 video](#) as we examine a combustible dust explosion that seriously injured a contractor and discuss the safety practices that can help prevent similar events in grain handling and processing facilities.

Interested in learning more about combustible dust safety? We have several courses on this topic. Check out one of our [full courses](#).

Our library of over 100 safety talks can be accessed by your Safety Made Simple admin in the resources section of your company's training portal. Click [here](#) to check out the full list of available Take 5 topics.

Heat stress doesn't discriminate. Whether you've worked in the heat for two days or twenty years, high temperatures can impair judgment and lead to serious illness before you realize there's a problem. As Safety Made Simple Content Creator Joe Mlynek says, "Heat doesn't care how long you've worked here." Learn the warning signs and the simple steps that can help keep your team safe this summer.

- Safe & Sound Week - Aug 10-16
- National 811 Day to Promote Safe Digging - Aug 11

Is It Safe? You Decide

Review the picture below and then you decide, Is It Safe?

NOT A CHANCE!

This drag conveyor is not properly guarded. Drag conveyors have an in-running nip point (pinch point) where the chain contacts the sprocket. Workers can be injured when hands and fingers come in contact with nip points on drag conveyors. Drag conveyors should be fully enclosed. If visual inspection is needed to verify product flow, permanently affixed grids or polycarbonate shields can be installed.

An Encouraging Word

"Seek first His kingdom and His righteousness, and all these things will be given to you as well."

Matthew 6:33
